The contributions by material type were determined in accordance with the provisions of Article 95 of the regulation, which states that:

*“The contribution a producer is required to pay pursuant to the third paragraph of Section 94 is calculated by multiplying the quantity of redeemable containers used by the producer during the year for which the contribution is required to commercialize, market or otherwise distribute a product, by a per-container amount set by the designated management body.”*

*“In setting the amount referred to in the first paragraph, the designated management body first calculates a basic amount applicable to every redeemable container belonging to a type of container, which may vary depending on the product commercialized, marketed or otherwise distributed in the container.”*
